Installation

This unit is designed for 10-16.8V negative ground operation system only. Before installing this unit make sure your vehicle is connected to 10-16.8V negative grounded electrical system.

The negative battery terminal must be disconnected before making connections, this will reduce the risk of damage from a short circuit.

Ensure you connect the colour coded leads as per the diagram. If you connect these incorrectly it may cause the unit to malfunction or damage the vehicles electrical system.

Ensure you connect the negative speaker leads to the negative speaker terminal and never connect the left and right channel speaker cable to each other or the vehicle body. Do not block any vents or radiator panels as this could cause heat to build up and may result in a fire.

After you have completed the installation of this unit including reconnecting the battery, press the reset button once on the front panel with a pointed object (ballpoint pen) to set the unit to initial status.

Frame Button Description

- PWR: Long press power on/off
- MUTE: Turn off sound
- VOL+: Volume up
- VOL-: Volume down
-  Menu button

-  Subtitles on/off
-  Keyboard switch
-  Short press last song, long press rewind
-  Short press next song, long press fast forward

Bluetooth Operation

NOTE: Due to different brands of devices using different Bluetooth modules and software, some features may be different and some devices may not be compatible with this unit.

To connect your device for the first time please ensure Bluetooth is enabled on your device. Select the Handsfree icon on the main menu and then search for your device name in the list and select to pair with it.

If a code is required it will be 0000 or 1234.

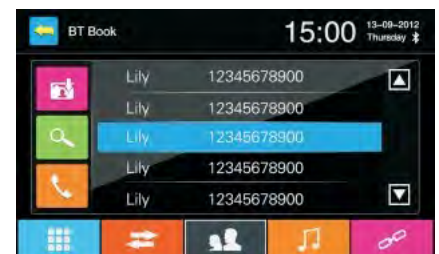

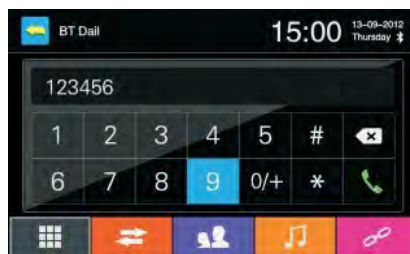

Once paired successfully the Bluetooth Icon will be shown in blue at the top of the screen and the icon on the left hand side will change to green.

Once connected you can make and receive phone calls and play music.

When the Bluetooth Icon is green  this means it is connected

To disconnect and reconnect touch this icon
