MOPEKA-ALEXA SETUP INSTRUCTIONS

The following instructions assume that your Alexa system is setup and operating, and your Mopeka Wifi Bridge (formerly called 'Gateway') is installed.

1. Open the Alexa home app.
2. Tap on the three horizontal bars in the top left corner of the screen (location may be different on different devices) to open the drop-down menu.
3. Tap on "Skills & Games" to pull up the screen that allows you to search for skills.
4. On the discover tab, tap on the little magnifying glass to bring up the search bar.
5. Type "Mopeka" into the search bar this will pull up the Mopeka Skill.
6. Download the Mopeka Skill to enable this skill.
7. Double check that the Mopeka Skill is linked, by going to the skills tab and seeing that the Mopeka Skill now appears. It will say "Linked".
8. If it is linked, then Alexa will now recognize the first command "Alexa, open Tank Check."
9. Alexa will then give a short introduction on how to use the skill and commands to use to check you tank.
10. If you have any troubles, you can always simply ask Alexa for help and Alexa will give a list of commands to use.
