

Introducing the new KEA Dreamland M725. Designed and built in New Zealand, by Action - one of New Zealand's favourite motorhome brands.

The KEA Dreamland has evolved from its much-loved predecessor, the KEA Dreamtime. We like to think of it as the best possible combination of performance, engineering and creature comforts.

Built with our customers in mind, we understand flexibility is key. The KEA Dreamland sleeps four people and offers a choice of two floor plans. One where the rear lounge can be converted into two single beds or

one large double bed. Or, our EB version which features an electric drop-down bed over the rear lounge. The choice is yours.

Both feature an over-cab double bed, classic U-Shape rear lounge with large panoramic double-glazed windows, a separate shower and toilet, ample kitchen workspace and generous storage space.

The Dreamland also has a huge range of quality features fitted as standard - all built on an exceptional Mercedes Benz 6-cylinder powertrain. It will take you to places you've only dreamed of - until now!
